

## Setting Up Scene Builder in Eclipse IDE

1. Download JavaFX Scene Builder from:  
<http://www.oracle.com/technetwork/java/javafxscenebuilder-1x-archive-2199384.html>
2. Change the path to Scene Builder in Eclipse to installation location, by clicking windows->preferences->JavaFX tab. If you install JavaFX Scene Builder on a 64-bit Windows machine, the default installation location is C:\Program Files (x86)\Oracle\JavaFX Scene Builder (version)
